28. Description of Change: (use additional Sheets if necessary)
The FRT Functionality Lab needs to move the mss_db and mss_acct_db databases on otis and the EcDmDictService and IoAdAdvService databases on relbhp to delaware to be consistent with DAAC configurations. Otis and relbhp are HP platforms and the DAAC uses SUN platforms which is what delaware is.

29. Proposed Solution: (use additional sheets if necessary)
Request RTSC create the following empty databases: mss_db_FRT, mss_acct_db_FRT, EcDmDictService_FRT, and IoAdAdvService_FRT on delaware. Request RTSC use the DEV02 mode of these databases on otis and relbhp as template. Request RTSC create sybase logins from otis and relbhp be on delaware. Request RTSC increase user connections to 150 and open databases to 20 and coordinate bouncing the Sybase server with Kathy Carr.

30. Alternate Solution: (use additional sheets if necessary)
Leave databases where they are.

31. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Inconsistent EDF/DAAC configurations.
